Get Connected Onboard With Our Advanced Multi-network Solution

FASTEST INTERNET SPEED • PRIORITIZED DATA • GLOBAL COVERAGE

Custom Solutions From 100Mbps to Multiple Gbps Bandwidth

AT LAST, INTERNET CONNECTIVITY AS IT SHOULD BE... AND STAYS COST EFFECTIVE

- Multiple GEO & LEO satellite constellations and 5G & 4G/LTE wireless networks
- Routable static IP address, over multiple networks without data package loss.
- Optimize local network integration and VPNs as needed.
- Multi-network approach enables the best onboard internet connectivity, mirroring an at-home internet experience
- Our advanced and efficient SD-WAN network solution delivers: greater coverage, faster bandwidth speeds, higher-capacity broadband and the most competitive pricing

RIGHT-SIZING ONBOARD NETWORKS FOR ENHANCED BANDWIDTH & THROUGHPUT

Enjoy the next generation of network connectivity, delivered via our converged connectivity solutions for true broadband and M2M applications. Our proprietary operating platform provides custom connectivity solutions enabling worldwide coverage on the Starlink satellite network and 5G/LTE wireless networks in more than 210 countries – all integrated within the FMC single platform. This provides the necessary network sizing for hundreds to thousands of simultaneous users at sea or at port, with Gbps bandwidth, enabling true enhanced and premium onboard internet.

5G WIRELESS & LEO/GEO SATELLITE CONNECTIVITY ONBOARD

With FMC upgrading yachting connectivity through unique 5G & Starlink customized and tailored data plan to your specific needs. Our worldwide network solutions provide true broadband bandwidth to ensure the fastest internet speeds with no throttling for all type of cruises. Ideal for passenger and crew wi-fi, video streaming, IPTV, social network applications, photo & video uploads, video-conferencing, anytime, anywhere in-port or while-sailing. Optimum SD-WAN and secure data solutions is ideal for all cruise types.

WORLDWIDE COVERAGE

210 countries covered on 4G & 5G wireless networks, with global Starlink satellite coverage, all integrated into our StarEdge™ platform with 99.95% uptime.

LEO SATELLITE – STARLINK

From a few Mbps to Gbps bandwidth, our solution is integrated with Starlink and connects on Ku-Band. Enjoy Starlink's cutting edge software steered flat-panel technology. A true maritime grade high performance satellite antenna without moving parts.

CUSTOM SOLUTIONS

Most cost-effective data solution with tailored data plans and managed network services. Let us perfectly size your local network to fit your connectivity needs and budget.

RELIABLE WI-FI

Now access Gbps bandwidth – no throttling and best guest Wi-Fi experience. IMO 2021 compliant; our network provides cyber security with: enterprise-grade encryptions; static IPs; SD-WAN; direct VPN; MPLS, and other network tunnels.

UNLIMITED VOIP CALLS

VoIP phone includes local number, unlimited calling to 46 countries, voicemail, and conferencing calling with meeting up to 50 participants per phone.

24/7 CUSTOMER SUPPORT

Dedicated engineers across the globe for all your managed network services. Our proprietary web portal and APIs enable complete visibility into system usage and statistics.

COMPREHENSIVE GLOBAL COVERAGE

- Network Sizing: Seamless switching, accommodates 100's to 1000's simultaneous users, mirrors home Wi-Fi experience
- Starlink LEO 5,000+ satellites constellation, coupled with FMC's 690 wireless partners worldwide in over 210 countries
- Benefits from multiple networks and satellite failover within the same constellation, out-of-band management, and higher network redundancy
- Prioritized data allotment with no wireless roaming fee and FMC's most advanced SD-WAN integration

BENEFITS OF STARLINK LEO SATELLITES

OPTICAL SPACE LASERS

InterSatellite links allow for truly global coverage, eliminating the need for local ground stations to transmit data.

COMPACT FLAT PANEL DESIGN

Allows for high-speed, low latency internet coverage worldwide.

STAR TRACKER TECHNOLOGY

Determines each satellite's exact location, allowing for the most precise broadband throughput.

WE ARE HERE TO SUPPORT THE CRUISE MARKET

Recognizing that cruise operators have different internet access needs and connectivity requirements, FMC GlobalSat is here to transition you to an optimized network and better cruise experience. Our multi-network connectivity solutions are perfect for adventure cruises, river cruises, expedition cruises and luxury cruises.

HOW WE HELP YOU

- No upfront CAPEX. FMC GlobalSat retains ownership of the equipment and is responsible for upgrading hardware and software when needed
- One time activation fee - covers installation, ALL future service, annual maintenance and equipment upgrades at no additional cost

STARLINK
OFFICIAL RESELLER

Founded in 2017 and headquartered in Florida – USA, FMC GlobalSat is a global provider of best-in-class satellite and wireless solutions to businesses that require reliable, secure, and cost-effective broadband and M2M connectivity solutions.

FMC GlobalSat has pioneered the delivery of converged connectivity solutions on a global scale, by partnering with major wireless carriers and satellite communications providers that incorporates 5G wireless solutions across CDMA, GSM, and LTE networks and high-throughput satellite (HTS) communications. Our networks incorporate Tier 1 carriers, and satellite infrastructure that includes dozens of satellites, teleports and a 24/7 enterprise-grade global technical support organization which enable us to provide SD-Wan, direct VPN, MPLS and other network tunnels while optimizing data traffic routes.
